EDUCATION

Istanbul University Cerrahpaşa

B.Sc. in Computer Engineering GPA : 2.85

Istanbul, Türkiye

Sep. 2022 – July 2026

Istinye University

Medical School

Istanbul, Türkiye

Sep. 2020 – July 2022

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, HTML, CSS, Java, C, Python, Swift, SQL

Frameworks & Libraries: React, Next.js, Razor, SwiftUI, Responsive Design, Component-Based UI Development

Backend, CMS & Cloud: .NET, REST APIs, MySQL, Microsoft SQL Server, Firebase, Docker

Concepts & Tools: Git, GitHub, VS Code, Eclipse, MySQL Workbench, Antigravity, Claude Code, Postman, OOP, ERP Fundamentals, Clean Code, UX/UI Fundamentals

Spoken Languages: English (Advanced), Turkish (Native), Spanish (Beginner)

EXPERIENCE

Long-Term Intern Frontend Developer

Baykar Teknoloji

February 2026 – Present

Istanbul, Türkiye

- Integrated Server-Sent Events (SSE) to enable real-time data updates in React and TypeScript-based confidential web applications.
- Contributed to Progressive Web App (PWA) related frontend improvements, enhancing mobile usability, responsive behavior, and app-like user experience.
- Integrated Auto-generated TypeScript API clients to manage type-safe API communication and maintain consistent frontend-backend service contracts.
- Managed server-state and asynchronous API flows using React Query, improving data fetching consistency, caching behavior, and frontend responsiveness.

Internet Banking Infrastructure Intern

Vakıfbank

Aug 2025 – Sep 2025

Istanbul, Türkiye

- Gained practical experience with Internet Banking, End-To-End Encrypted Point of Sale (POS) systems by analyzing banking transaction flows, service communication processes, and production-level infrastructure operations.
- Observed and supported monitoring, troubleshooting, and maintenance workflows for critical digital banking services in an enterprise banking environment.
- Supported infrastructure-related analysis and troubleshooting activities to better understand system reliability and service continuity.
- Learned about secure, scalable, and high-availability infrastructure practices used in financial technology systems.

Software Engineering Intern

Uyumsoft

Jul 2025 – Aug 2025

Istanbul, Türkiye

- Gained practical experience in ERP-oriented software development, focusing on business processes, modular system structures, and enterprise application logic.
- Developed web application features using .NET, C, Razor, and database-driven software architecture.
- Completed BusTicketWebRazor as an internship final project, implementing a ticket management web application with .NET Razor and database operations.

Financial Director

İÜC - Computer Science Club

Jul 2025 – Aug 2025

Istanbul, Türkiye

- Led financial planning and budget management for club events, workshops, and student-led initiatives.
- Collaborated with the executive board to assess event feasibility, optimize budgets, and prioritize funding needs.

AI-Supported 360° Performance Evaluation and Development Planning System

Bachelor's Thesis Project | Pandas, NumPy, LightGBM, XGBoost

- Developed the AI model and data processing pipeline for a 360-degree performance evaluation system that generates personalized employee development plans from HR and competency-based data.
- Merged, cleaned, and standardized multiple open-source HR datasets, creating a final dataset of 12,278 employee records and 30 structured features.
- Built a multi-label machine learning recommendation model to suggest relevant development actions from 47 possible action labels.
- Trained and compared LightGBM and XGBoost models using Micro-F1, Macro-F1, ROC-AUC, Hamming Loss, confusion matrix analysis, and cross-validation.

Kombin AI / Yakın Dostum - AI-Powered Mobile App | .NET, Python, SwiftUI

- Developed an AI-powered mobile application that allows users to upload their clothes and receive personalized outfit recommendations based on weather conditions and daily scenarios.
- Built a chatbot feature that enables users to interact with the application through natural conversation and receive style-related suggestions.
- Designed and developed the mobile interface using SwiftUI, focusing on a clean, user-friendly, and modern mobile experience.
- Integrated backend services with .NET and Python-based AI modules to support clothing analysis, recommendation logic, and chatbot functionality.

Confidential Enterprise Frontend Web Project | React, TypeScript, JavaScript, SSE, Git

- Contribute to the frontend development of a confidential enterprise-level web application using React, TypeScript, and JavaScript.
- Implemented Server-Sent Events (SSE) on the frontend to support real-time backend-driven updates and improve live data synchronization.
- Collaborated with backend developers to integrate APIs, manage asynchronous data flows, and align frontend functionality with backend services.
- Used Git-based workflows for branch management, version control, bug fixes, and feature collaboration in an active project environment.

BusTicketWebRazor - Ticket Management Web Application | .NET, C, Razor, SQL

- Developed a web-based bus ticket management application as the final project of my internship at Uyumsoft.
- Implemented backend logic using .NET and C, while building dynamic frontend pages with Razor views.
- Designed database-driven features for managing ticket operations, user interactions, and application data.
- Gained practical experience in ERP-oriented software development, relational databases, and enterprise application architecture.

Airlines Website - Airline Automation Web Project | React, TypeScript, JavaScript, Node.js

- Developed a web-based airline automation project with a modern frontend structure and backend integration.
- Built responsive user interfaces using React, TypeScript, and JavaScript to improve usability across different devices.
- Worked on project structure, data flow, and frontend-backend communication to create a maintainable web application.

Java Student Automation System | Java, OOP, Desktop Application

- Developed a student automation system using Java and object-oriented programming principles.
- Implemented core modules for managing students, academicians, personnel, and system-level operations.
